

(Reservoir) as a drinking water supply and the construction of a separate swimming lagoon (lagoon) within the existing reservoir footprint. A concrete-covered earthen berm would physically separate the lagoon from the main portion of the 80-acre reservoir. Water in the lagoon would be pumped, filtered, and treated to appropriate water quality standards for recreation use. This project would allow existing drinking water and swimming uses to continue at the Reservoir.

The action is proposed in response to an Order from the California State Department of Health Services requiring CCWD, as the water supplier, to either cease using the reservoir as a drinking water supply or eliminate body contact recreation activities occurring in it. The purpose of this action is to respond to the Order while allowing existing drinking water supply use to continue and maintaining the existing recreation activities at the Reservoir to the extent feasible. Recreation facilities at Contra Loma Reservoir are operated by the East Bay Regional Park District under an agreement with Reclamation.

Action alternatives evaluated in the DEIR/DEIS include construction of a water treatment plant, and connecting to East Bay Municipal Utility District's Mokelumne Aqueduct. No-Action alternatives evaluated include: (1) Stop use of the Reservoir for drinking water and allow body contact to continue, and (2) Stop use of the Reservoir for body contact activities and continue use as a drinking water supply.
